

Eastholme Surgery is proposing to merge services with Heaton Moor Medical Group in January 2018. We believe this merger will improve the sustainability and resilience of our practice and improve the range of services we are able to offer. This will include improved access to phlebotomy and a wider range of in-house services including minor operations, complex family planning and diabetes specialist nurses.

There will be no changes to staff so patients will still be able to see familiar clinicians of their choice, but there will also be access to a wider range of clinical experience across the merged practice.

Patients will be able to choose a location to visit and a time to suit including:-

- Wider range of appointments
- Times of surgeries including early morning, evenings and weekends
- Other sites across Stockport, Little Moor and Bosden Moor in Offerton and Dean Lane in Hazel Grove

The merger will enable us to offer other additional services at the practice such as:

- Minor operations
- Specialist Diabetic Nurse Practitioner
- 24 Hour BP Monitoring
- Coil fitting
- Open Access Blood Clinics across the four sites

We would welcome your comments and feedback on the proposed merger and any ideas and how we can tailor services in the practice moving forward.

You can email us on STOCCG.p88028-admin@nhs.net or complete a comments form available from our reception.
